PROTECTION OF RESIDENT WORKERS

Protection of Resident Workers: The City of Lewisville actively supports the Immigration and Nationality Act (INA) which includes provisions addressing employment eligibility, employment verification, and nondiscrimination. Under the INA, employers may hire only persons who may legally work in the United States (i.e., citizens and nationals of the U.S.) and aliens authorized to work in the U.S. The employer must verify the identity and employment eligibility of anyone to be hired, which includes completing the Employment Eligibility Verification Form (I-9). The Contractor and its Subcontractors shall establish appropriate procedures and controls so no services or products under the Contract Documents will be performed or manufactured by any worker who is not legally eligible to perform such services or employment. The audit will be at the City's expense.

IMMIGRATION REFORM AND CONTROL ACT

Immigration Reform and Control Act (8 U.S.C. §1324a): The City of Lewisville supports the Immigration Reform and Control Act (IRCA) which is a comprehensive scheme prohibiting the employment of unauthorized aliens in the United States. The Contractor shall ensure that its Subcontractors submit a declaration signed under penalty of perjury of the laws of the State of

Texas stating that they have not been found in violation of IRCA by the United States Attorney General or Secretary of Homeland Security in the preceding five (5) years. The Contractor and its Subcontractors shall at all times during the term of the contract with the City comply with the requirements of IRCA and shall notify the City within fifteen (15) working days of receiving notice of a violation of IRCA. The City may terminate a contract with the Contractor if the City determines that (a) the Contractor or its Subcontractors have been untruthful regarding IRCA violations in the preceding five (5) years; (b) if the Contractor fails to ensure that its Subcontractors submit the aforementioned declaration; or (c) the Contractor or its Subcontractors fail to timely notify the City of an IRCA violation.

Lewisville 2025 - Sustainability

Lewisville City Council unanimously adopted the Lewisville 2025 plan on July 14, 2014. The plan was developed after more than a year of public input and discussion that garnered hundreds of ideas and suggestions. That input was studied extensively by the Lewisville 2025 Steering Committee, City staff and professional consultants and formulated into the Lewisville 2025 plan. The plan provides a clear shared vision for the kind of community Lewisville wants to be when it turns 100 years old in 2025: a place that people choose to live, work and visit.

Lewisville 2025 identifies nine “Big Moves” to guide the community’s efforts toward being a thriving, desirable community. One of these Big Moves is sustainability. Lewisville defines sustainability in this way:

Limited resources, such as land, water, energy, clean air, natural assets, and public funds are used efficiently to provide a desirable quality of life and business climate today without reducing Lewisville’s ability to provide the desired quality of life and business climate for success of future generations.

The Purchasing Division’s goal is to support and encourage sustainable management practices through the purchase and use of materials, products and services that demonstrate environmental stewardship as well as fiscal and social responsibility. To that end, Lewisville will consider environmental factors such as but not limited to, recycled content, product life cycle, waste reduction, energy efficiency, toxicity, water consumption, and human health impacts when making purchasing recommendations. To assist City staff with evaluating these factors, prospective vendors may be required to provide specific information about their products and services that addresses environmental impacts.

7.

An advanced wastewater treatment technology provider. Our products are not technically "chemicals". We created our base liquid formulation in 1998, and it is considered a Bio Catalyst. We have been treating Fort Worth, TX . since 2016 and we have a very compelling story associated with Fort Worth, TX. Fort Worth came to use after trying "everything" (bioxide, mag hydrox, ferrous /ferric sulphate, hydrogen peroxide, etc.). After extensive testing we were successful and ultimately were awarded the odor – corrosion bid. We replaced hydrogen peroxide and reduced their cost by 30%. Because we were awarded the Fort Worth bid – contract, we are able to piggy back with any other Texas utility. Because we remove the scum layer, we offer odor and corrosion control far and above anything on the market. I am emailing to determine if we can bid on 25-64-A.

This would be a separate project. This bid is for the chemicals that we currently use.

8.

Considering the tariffs and pricing uncertainty with supplies of raw materials for chemical production is there a consideration for changing costs of these materials?

9.

What specific weighting criteria will be used to evaluate "Best Value" bids, and what percentage weight is assigned to each factor (price, reputation, quality, past relationship, etc.)?

This is an RFB be so the lowest bidder and second lowest bidder will be selected.

10.

How will the City determine the primary versus secondary contractor designation, and what performance metrics or criteria differentiate these roles?

This is an RFB be so the lowest bidder and second lowest bidder will be selected.

11.

What constitutes "inability to respond" or failure to "meet lead-time" that would trigger engagement of the secondary contractor?

Unavailability of product or unreasonable lead time for vital treatment chemicals, which may cause a lapse in treatment.

12.

Are there any planned capital improvements or operational changes at either treatment facility that could significantly impact chemical demand during the contract period?

Currently, there are no capital improvements or operational charges planned for this contract period.

13.

What historical price adjustment methodology has the City accepted in previous contract renewals, and what documentation standards are required for cost justification?

At the time of renewal, the City requires documentation proving the cost increase of the chemical. Then it is up to the City if they would like to move forward with the renewal or not.

14.

Does the City have budget constraints or spending caps that could limit actual purchases below the estimated annual quantities?

The City may order more or fewer chemicals requested on the bid table. This is up to the City's needs.

15.

What specific in-house testing protocols will be used for Carbon & Polymer samples, and what performance benchmarks must be met for acceptance?

For carbon, compare the % removal of MIB and Geosmin. For polymers, compare TOC and DOC removal.

16.

Are there preferred brands or suppliers currently used by the City that bidders should be aware of for comparison purposes?

For lab chemicals related to water treatment, Hach products are preferred but the City is open to all bids.

17.

What quality control procedures are in place for ongoing product testing throughout the contract term?

We rely on the contractor's lab analysis verification that is provided.

18.

What are the typical lead times the City requires for emergency orders, and how frequently do such situations occur?

7 Days lead time, and this situation is extremely rare.

19.

Are there specific seasonal demand patterns or peak usage periods that would affect delivery scheduling and inventory management?

The City has a significant increase in demand during the summer months. During this period, the City anticipates more frequent deliveries, and the prescribed delivery dates the City set will be met.

20.

What storage capacity limitations exist at each delivery location that could impact minimum order sizes?

There is storage available at both plants. This should not impact the minimum order size.

21.

How many vendors typically respond to this RFP, and what is the historical award pattern (single vs. multiple suppliers)?

Various suppliers have previously responded, and multiple suppliers have been awarded.

22.

What performance issues or service gaps has the City experienced with previous chemical suppliers that this contract aims to address?

None.

23.

Are there any upcoming regulatory changes or treatment process modifications that could affect chemical specifications or quantities during the contract term?

Currently, no changes are planned for this contract period.
