(1) The city shall assess a capital recovery fee for water and sewer in association with new development and construction. If modification of an existing unit increases the potential for use of water and sewer services, a fee shall be assessed. The fee shall be calculated by the living unit equivalent method (or LUE) in which water and sewer usage is determined by a factor relative to one- and two-family dwellings. The capital recovery fee for water and sewer shall be per the schedule shown above. The following guideline has been established to provide a standard for the capital recovery fee determination.

(2) The meter equivalence shall be determined by the size of the required water meter at the city's delivery point with the exception of one- and two-family dwellings installing a NFPA 13D or townhouses with NFPA 13R type of fire sprinkler systems.

(3) Where a NFPA 13D or 13R fire sprinkler system is installed in accordance with section 2-201 Exhibit A(2), impact fees and water and sewer usage shall be based on the meter size required excluding the fire sprinkler

system water demand (i.e., a 3/4" meter required without a fire sprinkler system vs. a 1" meter requirement when a fire sprinkler system is installed would only be charged (LUE) and minimum water and sewer usage rates for the 3/4" meter).

The maximum water impact fee per LUE, as determined in the July 2018 Five-Year Water and Wastewater Impact Fee Review, is \$2,614.89. The maximum wastewater impact fee per LUE, as determined in the July 2018 Five-Year Water and Wastewater Impact Fee Review, is \$3,949.72.
